

## REHAU Heritage **VERTICAL SLIDING WINDOWS**

Suppliers of high quality uPVC windows, doors and conservatories

The REHAU Heritage vertical sliding window incorporates the traditional features of a timber sash window with the added benefit of the attributes found with our uPVC windows.

Designed with the styling of typical period sashes, these windows are considered one of the most distinctive and authentic looking uPVC vertical sliders available on the UK market.

- ❖ Cutting edge, innovative design yet traditional in style
- ❖ Thermally and Energy Efficient with BFRC ratings of A and C
- ❖ Security Enhanced to PAS24:2016 and accredited with Secured By Design status
- ❖ Ideal for both replacement and new build markets

**Mechanical Sash Horn**

**Run Through Sash Horn**

**A decorative sash horn is available to complement the traditional look found with a timber window.**

**Both mechanical and run through sash horns are available with the run through offering the most realistic reproduction.**

**Traditional hardware and locking catches add further authenticity to the finished window**

## Heritage VS Features & Benefits

- Improved three chambered sash profiles give increased thermal efficiency
- Excellent weather performance - incorporating triple brush seals
- Increased maximum sizes
- Mechanically jointed deep bottom rail detail and decorative sash horns complete the traditional look
- Low level gasketry provides 'easy on the eye' sightlines with excellent UV stability properties
- Tilt in sash facility allows for easy cleaning
- Limit stops available to enhance safety when opening sashes
- Only high quality pre-tensioned window balances used
- Authentic Georgian designs
- Installer friendly concealed fixing groove
- 149mm or 225mm cill options available
- Smooth gliding mechanism
- Available in white and white woodgrain as standard

Our vertical sliding windows have been tested to PAS 24:2016 Enhanced Security Performance and subsequently accredited to Secured By Design status.

Steel reinforced frames and anti-jimmy aluminium bars are used for built-in security, and the additional provision of security sash locks, tilt latches, and anti-jimmy blocks have enabled our vertical slider to become certified as a police preferred product under this security initiative.
